SUMMARY

Enterprise Architect with 25+ years defining and implementing enterprise architecture strategies for Fortune 500 clients across Healthcare, BFSI, and regulated industries. Director-scope leader architect designing application-heavy, multi-cloud solutions and building end-to-end enterprise systems with proven delivery at scale (40M+ programs, 100+ global teams). Established expertise in Generative AI and Agentic AI integration into enterprise applications (300%+ ROI), multi-cloud platforms (AWS, Azure, Google Cloud), microservices architecture, integration patterns (REST, GraphQL, Kafka, message queues), and Infrastructure-as-Code. Proven ability to guide cross-functional teams, translate stakeholder requirements into scalable architectures, collaborate on complex transformations, and stay current with emerging technologies. Combines hands-on technical depth (Python, full-stack development, DevOps) with strategic vision and executive stakeholder influence.

EXPERIENCE

Digital Architect, Philips | Digital & Innovation Platform | Feb 2020 – Present

- Director-equivalent scope: define and implement enterprise architecture strategies across a large application portfolio, leading multiple programs (direct 8M+ in 2025)
- Delivered Agentic AI system integrated into enterprise applications with concrete ROI (>300%), architecting end-to-end solution from concept to production
- Established integration strategies across cross-functional teams, ensuring delivery assurance with multi-vendor teams in a deeply regulated environment
- Incorporated Generative and Agentic AI capabilities into legacy business processes and applications, leading from ideation through deployment
- Designed cloud-native solutions leveraging microservices, Kubernetes, Docker, and CI/CD pipelines on Azure
- Internal AI champion collaborating with stakeholders to translate business requirements into scalable technical solutions

Principal Solution Engineer, Oracle | Sales & Solution Engineering | Apr 2017 – Jan 2020

- Served as trusted technical advisor to CXO/senior leadership for cloud strategy, architecture strategies, and adoption roadmaps across multi-cloud platforms (AWS, Azure, GCP, OCI)
- Designed application-heavy solutions across multiple clouds, demonstrating technology value proposition with Chief Architects through workshops (20+) and proof-of-concepts
- Led full-stack development of reference architectures spanning front-end (React, Angular), backend (Python), integration patterns (REST, GraphQL, Kafka), and Infrastructure-as-Code
- Guided cross-functional teams through complex technology decisions, mentoring engineering teams on microservices, Kubernetes, Docker, and DevOps practices
- Supported complex pre-sales deals and large wins (8+) at Indian MNCs, PSU Banks, and Governments
- Technology evangelist representing OCI in industry and customer forums, staying current with emerging technologies

Principal Architect, Cognizant Technology Solutions Ltd. | Global Technology Office | Jan 2008 – Mar 2017

- Owned architecture and solution for multiple large-scale enterprise transformation programs (largest > 40M+), leading global team (100+)
- Defined and implemented enterprise architecture strategies through strategic consulting (20+) with premier global customers across NA, APAC, EMEA
- Architected end-to-end enterprise systems for 20+ strategic pursuits in Healthcare, Pharmaceutical, Life Sciences, and BFSI, orchestrating complex multi-disciplinary technologies
- Established integration strategies and designed solutions leveraging microservices, event-driven architecture, messaging, and enterprise security standards
- Managed Architecture CoE mentoring team of senior architects (15), driving standards and governance
- Delivered solution demos, technical workshops (40+), and collaborated with stakeholders to translate requirements into scalable architectures

Solution Architect, Tata Consultancy Services Ltd. | Global Consulting | Jul 2000 – Dec 2007

- Programmer to Solution Architect journey with extensive experience in end-to-end software development lifecycle across Banking & Insurance domains
- Served as Technical Architect of a leading Banking & Insurance Suite, leading successful rollout for a flagship customer
- Designed distributed enterprise systems with strong focus on integration patterns and enterprise security

CORE STRENGTHS

Enterprise Architecture & Strategy: Define and implement enterprise architecture strategies; architect end-to-end enterprise systems; design application-heavy solutions across multi-cloud platforms; establish integration strategies connecting diverse technology stacks; guide cross-functional teams; translate stakeholder requirements into scalable technical solutions.

Generative AI & Agentic AI Integration: Expert knowledge in GenAI and Agentic AI patterns, frameworks, and orchestration; currently leading large-scale AI transformation deployed to production (300%+ ROI) with advanced observability and governance; proven ability to incorporate AI capabilities into enterprise applications.

Multi-Cloud & Enterprise Integration: Deep architectural expertise across AWS, Azure, Google Cloud, and Oracle Cloud; master of integration patterns (REST, GraphQL, Kafka, message queues, ESB); strong command of microservices, Kubernetes, Docker, Infrastructure-as-Code, DevOps, and CI/CD pipelines; enterprise security standards and regulatory compliance.

Technical Leadership & Delivery: Hands-on architect with polyglot technology depth (Java, Python, React, full-stack development); proven ability to rapidly adopt and integrate emerging technologies; delivered large-scale programs (40M+), led global teams (100+), mentored senior architects; exceptional problem-solving, analytical capabilities, and stakeholder communication.

SKILLS

Generative AI, Agentic AI, Applied AI

- LLM: Azure OpenAI, GCP Vertex AI, Anthropic Claude, Claude API | Frameworks: LangChain, LangGraph, CrewAI, Autogen, Google ADK | Evals frameworks & design | Vector DB: Azure AI Search, Chroma, FAISS, Pinecone | State & Memory management | AI Guardrails, Safety, Ethics & Governance
- RAG Patterns | Protocols – MCP, A2A | Langfuse, Observability Tools | NLP, NER | Computer Vision, OpenCV | Multimodal processing | MLOps, LLMOps | Fine-tuning approaches
- Python: Advanced LLM orchestration & frameworks, FastAPI, Streamlit, Gradio, PyTorch, TensorFlow

Multi-Cloud Platforms & Solution Architecture

- Azure: AI Foundry, Functions, WebApp, AKS, Cosmos, Data Fabric | AWS: EC2, Lambda, S3, EKS, SageMaker, Bedrock | GCP: Vertex AI, GKE, BigQuery | OCI: IaaS, PaaS
- Integration Patterns: REST, GraphQL, gRPC, Kafka, message queues, ESB, iPaaS, event-driven architecture
- Microservices, Kubernetes, Docker, Service Mesh, API Security (OAuth2, JWT, SCIM), APIM

Full-Stack Development & DevOps

- Front-end: React, Angular, Next.js, TypeScript | Backend: Python (FastAPI), Java/SpringBoot
- CI/CD pipelines, GitHub, Azure DevOps, GitOps, Terraform, CloudFormation, Infrastructure-as-Code
- DevOps practices, SRE principles, containerization, orchestration

Data Management

- RDBMS: Oracle, PostgreSQL | NoSQL: Redis, DynamoDB, MongoDB | Data Platforms & Analytics | Data Lake
- Data design, governance, ELK, CNCF ecosystem

Enterprise Architecture & Security

- Enterprise Architecture: TOGAF, Zachman frameworks | ArchiMate, Sparx, ARIS, BPMN tools
- Enterprise Security standards | Regulatory compliance: GDPR, HIPAA, SOX | Microservices security | API Security (OAuth2, JWT, SCIM)

Program & Team Management

- Agile, Scrum, Kanban, SAgE | Managed Architecture CoE (15 architects) and large delivery teams (100+)
- Stakeholder management, cross-functional leadership, performance management, recruiting

EDUCATION

Bachelor of Engineering, Electrical Engineering, Jadavpur University, India, 1996-2000
